Sorry to learn of Jim's passing. He was always a pleasure to talk with. At work we would talk of old cars and hot rods in our spare moments. Would see him at many of the local car shows where we would catch up on his latest project he was working on. Always had a smile on his face when ever we met. May he rest in peace.

Dear Sharon and family members, Many of us friends and colleagues of Jim from the Navy JEDMICS Program Office were deeply saddened when learning of his passing. Jim was indeed a very fine gentleman as well as a deeply respected & welcomed member of the Program Office who professionally represented the Air Force several years ago. Jim touched everyone he was associated with his big southern country gentleman smile. All of us in the Navy program office are blessed to have known and worked with someone this special. Our thoughts and prayers are with you and all the Richardson family members during this time. May your spirits be lifted knowing Jim now rests in the presence of our dear Lord. With our sincere sympathy & heartfelt condolences, The Navy JEDMICS Program Office members, past and present.

Big Jim was such an influence in my life..... I so loved the times I spent at the Richardson home just talking and watching TV, I always hated to leave. Memories flood back – he was so excited to get that humongous satellite dish in his back yard when they first came out!!! I remember his pain and vulnerability when he lost his son.I remember his love of old cars and the joy when he built his shop, and worked on the cars.I remember his creative engineer like mind he used, when he helped me with my candles business equipment.I remember his love for his family, be it firm or gentle, they knew his love,....and gratefully so did I."The day which we fear as our last is but the birthday of eternity."

I worked with Jim for many years. Jim was an excellent Program Manager and his stewardship with the early JEDMICS program is still being felt at Robins and across the AF. The program was one of the very few successful DOD IT initiatives and it is still being used today. Thanks for your service Jim.
